lthofficial01@gmail.com | (+82) 010-3342-0189 | <https://lthofficial01.github.io>

Undergraduate Data Science student focused on biomedical data analysis, machine learning, and big data pipelines.

Last updated: June 12, 2026

EDUCATION

Myongji University - B.S. in Data Science, Convergence Software

Seoul, S.Korea | Mar. 2022 - Feb. 2027 (Expected)

- Total GPA: 4.15 / 4.50

INTERNSHIPS

Undergraduate Researcher, Artificial Intelligence and Data Analytics Lab (AIDALab)

Advisor: Prof. Min Sik Oh | Seoul, S.Korea | Jan. 2025 - Dec. 2025

- Conduct ML/DL research on multi-modal biomedical big data for disease and drug response prediction.
- Built a client-side web tool with React and Pyodide for privacy-preserving proteomics analysis and ML workflows.

PROJECT EXPERIENCE

Primary Researcher - Client-Side Olink Proteomics Web Analyzer

AIDALab, Myongji University | Mar. 2025 - Dec. 2025

- Built a browser-based Olink NPX analysis platform that performs fully local computation for privacy-sensitive clinical data using React, Web Worker, and Pyodide.
- Implemented an end-to-end exploratory pipeline including QC filtering, wide-to-long pivoting, PCA visualization, and rank-sum/BH-FDR volcano analysis.
- Designed interpretable L1 logistic regression baselines with leakage-free train-only feature selection and dynamic seed construction.
- Optimized data handling and browser memory efficiency through chunked loading, schema inference, and Web Worker-based asynchronous execution.

AWARDS AND HONORS

- 2025 - Semester High Honors, Dept. of Convergence Software, Myongji University
- 2025 - Freshman Mentoring Fellowship (University Innovation Program), Myongji University
- 2024 - Semester High Honors, Dept. of Convergence Software, Myongji University
- 2023 - Semester High Honors, Dept. of Convergence Software, Myongji University

EXTRACURRICULAR ACTIVITY

Club Member - BDAI (Be Data-literate, Advance with AI)

Seoul, S.Korea | Mar. 2026 - Feb. 2027 (Expected)

- Completed intensive curriculum on mathematical foundations for data science and data preprocessing techniques.
- Participated in end-to-end data modeling projects with a focus on model deployment and production-ready pipelines.
- Conducted exploratory data analysis and implemented machine learning models for real-world datasets.

Mentor - University Innovation Program, Freshman Mentoring

Myongji University | Mar. 2025 - Dec. 2025

- Guided freshman students in the Convergence Software department to adapt to university life and academic requirements.
- Shared study strategies and foundational programming knowledge to support early academic success.

Club Member - COIN (Co-Insight Data Analysis Club)

Myongji University | Mar. 2024 - Dec. 2024

- Engaged in weekly study sessions on advanced machine learning algorithms and statistical methodologies.
- Collaborated on data analysis projects covering the full pipeline from raw data EDA to machine learning modeling.

SKILLS

- Programming: Python, JavaScript
- AI and Data Science: Machine Learning, Deep Learning
- Frameworks and Tools: PyTorch, scikit-learn, Pandas, React, Node.js, Pyodide
