“Be the change that you want to see in the world.”

Education

Myongji University

B.S. IN DATA SCIENCE, CONVERGENCE SOFTWARE

- Total GPA: 4.17 / 4.50

Seoul, S.Korea

Mar. 2022 - Feb. 2027 (Expected)

Internships

Artificial Intelligence and Data Analytics Lab (AIDALab)

UNDERGRADUATE RESEARCHER (ADVISOR: PROF. MIN SIK OH)

- Conduct ML/DL research on multi-modal biomedical big data for disease and drug response prediction.
- Built a client-side web tool (React, Pyodide) for privacy-preserving proteomics analysis and ML workflows.

Seoul, S.Korea

Jan. 2025 - Dec. 2025

Project Experience

Client-Side Olink Proteomics Web Analyzer

PRIMARY RESEARCHER

- Built a browser-local Olink NPX analysis workflow for sensitive biomedical data using React, TypeScript, Pyodide, Web Worker, and Plotly.
- Implemented file/schema handling, pivot, QC, PCA, DEP/volcano, missingness, ML baseline, and PPI network modules.
- Reduced evaluation leakage with train-only feature selection and improved browser stability through chunk loading and memory optimization.

AIDALab, Myongji University

Mar. 2025 - Dec. 2025

SAC on Screen Regional Genre Recommendation Pipeline

PROJECT LEAD

- Built a reproducible HDFS-to-Spark-to-Hive pipeline that combines performance reservation patterns with regional population data.
- Designed a region-level genre demand index and generated Top 3 content recommendations for each municipality.
- Implemented PySpark preprocessing, Hive external tables, HiveQL analysis, CSV export automation, and Matplotlib result visualization.

Big Data Project

2026

Awards & Honors

HONORS

- | | | |
|------|---|----------------|
| 2026 | Semester High Honors , Dept. of Convergence Software, Myongji University | Seoul, S.Korea |
| 2025 | Semester High Honors , Dept. of Convergence Software, Myongji University | Seoul, S.Korea |
| 2025 | Freshman Mentoring Fellowship (University Innovation Program) , Myongji University | Seoul, S.Korea |
| 2024 | Semester High Honors , Dept. of Convergence Software, Myongji University | Seoul, S.Korea |
| 2024 | Freshman Mentoring Fellowship (University Innovation Program) , Myongji University | Seoul, S.Korea |

Extracurricular Activity

BDAI (Be Data-literate, Advance with AI)

CLUB MEMBER

- Completed intensive curriculum on mathematical foundations for data science and data preprocessing techniques.
- Participated in end-to-end data modeling projects with a focus on model deployment and production-ready pipelines.
- Conducted comprehensive exploratory data analysis (EDA) and implemented machine learning models for various real-world datasets.

Seoul, S.Korea

Mar. 2026 - Feb. 2027 (Expected)

University Innovation Program - Freshman Mentoring

MENTOR

- Guided freshman students in the Convergence Software department to help them adapt to university life and academic requirements.
- Shared effective study strategies and foundational programming knowledge to support their early academic success.

Myongji University

Sep. 2024 - Jun. 2025

- Engaged in weekly study sessions to deepen understanding of advanced machine learning algorithms and statistical methodologies.
- Collaborated on diverse data analysis projects covering the full pipeline from raw data EDA to machine learning modeling.

Others

Programming Python, R, Java, SQL, TypeScript, JavaScript

Data & ML Pandas, NumPy, Scikit-learn, PyTorch

Big Data HDFS, Apache Spark, PySpark, Apache Hive, HiveQL, Parquet

Web & Visualization React, Vite, Pyodide, Plotly, Matplotlib

Languages English
